Gain strategic insights and make informed decisions confidently with Optimus, the first tax software to standardize and centralize property tax data across multiple countries, languages, and currencies in one user-friendly platform. Optimus presents a clear view of property portfolios in North America and worldwide, enabling easier identification of regional and global tax reduction opportunities and faster initiation of tax-saving strategies.

Budgeting, forecasting, and task management are simplified and streamlined. Powerful processing speed cuts time spent importing and exporting data, performing queries, and completing operational tasks from hours to minutes. Increased transparency spans all management levels and geolocations, reducing errors and redundancies, improving efficiency, and boosting productivity. Used by Ryan tax professionals to manage billions of dollars of clients' property tax liabilities, Optimus is the premier software solution for global property tax management, assessments, and appeals.

Key Features and Benefits

- ▶ "Infinity Dashboard" lets you customize instant reports based on your specific needs
- ▶ Leverage existing app investments via API/synchronization
- ▶ Improved speed and quality controls with custom workflow management
- ▶ Reduced penalties, interest, and missed deadlines with event calendar
- ▶ Range of services to support conversion/implementation, data integrations, and training
- ▶ Optional enhanced productivity services and mailroom outsourcing
