PropertyPoint™

File your first property tax renditions in just 15 minutes – It makes filing almost fun. I said almost…

Begin the filing process with PropertyPoint's dynamic import mapping. You can swiftly drag, drop, and match your source data fields and advance to filing mode in a flash. PropertyPoint was designed for speed giving users several productivity boosts throughout the compliance workflow. You can import data, organize assets, group returns and file—completing the process in mere minutes.

Even better, PropertyPoint can be bundled with digital access to your property tax values and bills to reduce reliance on paper mail delivery and manual data entry. We can deliver your property tax values and bills straight from the jurisdictions, ensuring data accuracy and reliability. It's all designed to streamline processes and make your workday that much more efficient.

As real and personal property assessments arrive, PropertyPoint's multi-state capabilities shine. Supported by a robust workflow, PropertyPoint provides visibility into everything that needs to be done throughout the annual tax cycle. Incur the right amount of tax—no more and no less—using appeal tracking, obsolescence reporting, and target values. Finally, track and pay taxes through the system, completing the cycle.

Award-Winning Tax Services
